Information Systems Bachelor's Degree - CUCEA  
Business Management Diploma - UDG

## Languages

Spanish

English

## Strengths

- Punctuality
- Fast Learning
- Commitment
- Organized
- Curious
- Problem solving

## Profile

As a degree holder in Information Technology, I'm passionate about technologies and have a thirst for knowledge. In a short time, I have learned how to develop a website and create responsive web user interfaces by using HTML5, CSS3, Bootstrap4, and master diverse web technologies and techniques through a full-stack bootcamp. I deliver best practices for quality assurance by understanding the importance of best practices for coding, and use the latest trends in application development. I am strong in Waterfall, Scrum and Kanban methodologies and implemented that for a project where I was the only contributor who could work in sequential phases. I'm excited to keep learning how technology can interact with users by creating ideas to provide the best solutions, and to make better or interesting products.

## Professional Experience

- **Appen //**  
*Search media evaluator - Social media evaluator*  
Increased search engine accuracy for projects and enabled higher volumes of searches, text, audio, and video data used to build and improve artificial intelligence systems.
